

شرح الجمل لابن واصل الحسموي

KHALED EL-ROUAYHEB
(Ph.D. 2003), is Jewett Professor of
Arabic at Harvard University.
His monographs include *Relational
Syllogisms and the History of Arabic
Logic, 900-1900* (Brill, 2010) and *The
Development of Arabic Logic,
1200-1800* (Schwabe, 2019).

Ibn Wāṣil (d. 1298), perhaps better known today as a historian and an emissary to the court of King Manfred in southern Italy, was also an eminent logician. The present work is a critical edition of his main work in the field, a commentary on his teacher Khūnājī's (d. 1248) handbook *al-Jumal*. The work helped consolidate the logic of the "later scholars" (such as Khūnājī). It also shows that commentators did much more than merely explain the original work and instead regularly discussed and assessed received views. Ibn Wāṣil's work was an influential contribution to a particularly dynamic chapter in the history of Arabic logic.
